DATA ANALYST | BUSINESS ANALYST | POWER BI | SQL | PYTHON

Analytical professional with 3+ years of experience converting raw operational and financial data into strategic business insights. Expertise in SQL, Power BI, Python, Excel, KPI reporting, forecasting, dashboard automation, stakeholder reporting, and process optimization. Proven track record of reducing reporting cycles by 40%, improving visibility across 1,000+ projects, and enabling data-driven decisions.

CORE COMPETENCIES

SQL • Power BI • Python • Excel • Dashboarding • Data Visualization • KPI Tracking • Forecasting • ETL • Data Cleaning • Data Validation • Business Analysis • Requirement Gathering • Process Improvement • Stakeholder Management • Reporting Automation • Root Cause Analysis

PROFESSIONAL EXPERIENCE

NEDFi | Project Engineer – MIS & Analytics

May 2024 – Present

- Managed analytics and MIS reporting for **1,000+ government-funded projects** across 8 states.
- Developed interactive **Power BI dashboards** tracking utilization, delays, KPIs, and compliance metrics.
- Reduced reporting turnaround time by **40%** through automation and standardized reporting workflows.
- Performed data reconciliation and validation across multiple sources to improve reporting accuracy.
- Delivered executive-ready insights on delays, budget overruns, and operational risks.
- Supported leadership decision-making with trend analysis and performance reporting.

Alliance Engineers | Assistant Engineer – Data Analysis

Feb 2023 – Apr 2024

- Converted survey and field datasets into structured reports for planning and execution teams.
- Built data models supporting infrastructure planning and approval workflows.
- Improved data quality through cleansing, standardization, and reporting controls.
- Generated periodic MIS reports for cross-functional stakeholders.

KEY PROJECTS

SaaS Revenue & Retention Analytics

- Built SQL + Python churn and cohort models to analyze customer retention.
- Created dashboards identifying growth opportunities and potential **19% revenue recovery**.
- Tracked subscription lifecycle KPIs including churn, retention, and LTV.

Pricing & Promotion Impact Simulator

- Developed regression model ($R^2 = 0.83$) to forecast demand sensitivity.
- Designed Power BI what-if dashboards for pricing and promotion strategy.

Sales Forecasting Dashboard

- Modeled historical sales data using MySQL + Python.
- Built forecasting dashboards with region/product performance insights.
