DATA ANALYST | BUSINESS ANALYST | POWER BI | SQL | PYTHON

Data-driven analyst with 3+ years of experience transforming operational and financial data into actionable business decisions.

Specialized in identifying profit leaks, optimizing pricing strategies, improving reporting efficiency, and enabling leadership with decision-ready insights.

CORE SKILLS

SQL • Power BI • Python • Excel • Data Modeling • ETL • KPI Tracking • Forecasting
Dashboarding • Business Analysis • Process Optimization • Stakeholder Reporting • Root Cause Analysis

PROFESSIONAL EXPERIENCE

NEDFi | Project Engineer – MIS & Analytics

May 2024 – Present

- Managed analytics and MIS reporting for **1,000+ government-funded projects across 8 states**
 - Built Power BI dashboards tracking **budget utilization, delays, KPIs, and compliance metrics**
 - Reduced reporting turnaround time by **40% through automation and workflow standardization**
 - Identified operational delays and cost overruns through trend analysis and data validation
 - Delivered executive-level insights enabling **faster decision-making across multiple stakeholders**
-

Alliance Engineers & Consultants | Assistant Engineer – Data Analysis

Feb 2023 – Apr 2024

- Converted raw survey and field data into structured reports for planning and execution
 - Built data models supporting infrastructure planning and approval workflows
 - Improved data quality through **cleansing, validation, and reporting controls**
 - Delivered MIS reports for cross-functional teams supporting project execution
-

KEY PROJECTS

Retail Profit Optimization Dashboard (Power BI, Python)

- Identified **700+ loss-making products** across categories
 - Discovered **discounts >20% as primary driver of negative margins**
 - Built dynamic dashboards with **real-time insights and recommendations**
 - Highlighted high-sales loss products causing major financial impact
 - Recommended pricing optimization strategy with potential **15–20% margin improvement**
-

SaaS Revenue & Retention Analytics (SQL, Python, Power BI)

- Built cohort and churn models to analyze subscription lifecycle behavior
 - Identified key churn points and revenue leakage across customer segments
 - Designed dashboards tracking **retention, churn, and LTV metrics**
 - Simulated revenue recovery through retention improvements (**up to 19%**)
-

Pricing & Promotion Impact Simulator (Python, ML, Power BI)

- Developed regression model (**$R^2 = 0.83$**) to predict demand sensitivity
 - Built interactive pricing simulator to evaluate revenue vs profit trade-offs
 - Enabled data-driven pricing decisions and promotion strategy optimization
-

EDUCATION

B.Tech, Civil Engineering
KIIT University | 2018 – 2022
